<i>The letter f</i>	32		

Spacing between words

Learning intention:

To focus on the spacing between words

I am successful when I can:

- ☐ check my 3Ps
- ☐ make spaces even
- ☐ write letters of the same size.

Tip!

Looking at these sound waves, you can see spaces. There is also a space bar on the keyboard. We need spaces in sound, in our typing and in our writing to make sense of things.

Rewrite this passage, using even spaces between the words.

When words are too close

together or too far apart, it

makes the writing difficult to read. The

spaces between words need to be even, and

letters must be of the same size.

Self-assessment

Assess how you are going with the spacing between letters and words.

☐ I need some more practice

☐ I'm making progress

☐ I've got it!

Teacher comment

Copy this passage, keeping a consistent size for your letters and even spaces between the words.

Professor Fiona Wood is a plastic surgeon

and burns specialist who lives in Perth.

Professor Wood and Marie Stoner invented

“spray-on skin”. This technique was a world

first and has saved the lives of thousands

of people with severe burns. In 2005,

Fiona Wood was named

Australian of the Year.
